FACSIMILE

Mr. Charles Terreni
Public Service Commission

RE: Document Number: 2007-41-W

Dear Mr. Terreni:

We understand that the above-referenced document could delay the installation of Columbia City Water to Ashley Oaks Subdivision. As a homeowner in Ashley Oaks, Phase Two, we strongly urge that this document not delay the Columbia City Water from proceeding to provide water to our subdivision. The volume of water and pressure that can be supplied by the City of Columbia is urgently needed for myself and other homeowners in Ashley Oaks Subdivision.

Due to the low water volume and pressure from the current Ashley Oaks Water System, we do not have adequate water pressure or volume for our house, or for use of outside watering. This will also provide fire protection from hydrates recently installed from City of Columbia taking over the water system.

Any consideration in this matter will be greatly appreciated.

Sincerely,

Robert and Carolyn McLeod
